OPEN FORUM 2014

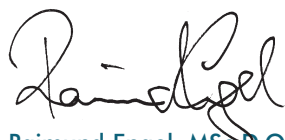

Dear colleagues in osteopathic education,

On behalf of the Osteopathic European Academic Network (OSEAN) we would like to invite you to join us at the Open Forum "Innovation in Osteopathic Education" in Barcelona, Spain.

The programme's keynotes, presentations and workshops will all be related to the use of technology and teaching aids in osteopathic education, the growing influence of educational science, and stimulation of critical thinking.

We have had a lot of response to our call for papers and are happy to present you an exciting programme that is covering all the relevant topics in this field.

We look forward to welcoming you at our meeting!

Raimund Engel, MSc D.O.
OSEAN President

Osteopathic European Academic Network

OSEAN is a group of like-minded osteopathic educational institutions with a common mission:

- To develop a standardised model of osteopathic education throughout Europe
- To provide a common European representation of schools in a time of emerging European standards
- To foster collaboration and innovation among its member schools in various areas including administration, education, research and service.
- To establish and develop common research streams
- To achieve academic recognition for osteopathy in all countries

All OSEAN schools hold the tenet that osteopathic training should be degree validated programme at an MSc level as a precursor to the attainment of admission to practice-life. Therefore all schools strive for an academic partnership with a university to obtain that goal.

Currently the OSEAN members do have such partnerships with 13 different universities, some more are in the stage of preparation.

OSEAN is incorporated as a non-profit organisation in Vienna, Austria.
